

RadViewer Functionality

Manage RadWatch dosimeter assignments to responders prior to a radiological incident or onsite as needed during an event

Handheld RadViewer offers the following RadWatch program management capabilities:

- Works exclusively with the Radwatch dosimeters
- Establishes chain of custody between the issued RadWatch dosimeter by serial number and the responder by name who is wearing the dosimeter

Interchangeable battery via standard USB cable

Data Management Software:

- Utilizes an Apple iPod Touch as the primary user interface
- Can be used to view the RadWatch dosimeter assignment and the last dose reading that was assigned to the dosimeter
- Shows RadWatch dosimeter history - all scanned information by dosimeter serial number
